

THE VIRGINIA VACCINES FOR CHILDREN PROGRAM

Welcome to the Virginia Vaccines For Children Program!

With your help, we can raise immunization levels in Virginia and help ensure Virginia's children are protected from vaccine preventable diseases.

The Membership Handbook is designed with you, the VVFC provider, in mind. This book provides program guidance for new and current VVFC members. The Membership Handbook contains information regarding VVFC program procedures for enrolled facilities. Information on vaccine recommendations and policies, and a list of resource numbers are also included.

The appendix includes frequently used forms and documents for you to copy and use at your facility. Documents not often updated are bound in this Handbook; however, for your convenience we have included an electronic version of the updated forms and documents on an enclosed compact disc. Included on the disc are the Vaccine Information Statements (VIS). These can be copied for distribution at your facility, and they should be provided to parents before every administered vaccine.

This Membership Handbook should put your facility on track and continue to be a valuable resource! If you have any questions about the VVFC program, please contact our office.

*Thank you for participating in the
Virginia Vaccines For Children Program!*
